←横のQRコードから、ご協力をお願いします。

## ☆中高生の集い☆

**3月12日(水)17時40分～**

場所：3階 多目的室

《バレーボール》

学校・学年に関係なく、同じ空間でスポーツやレクリエーションを楽しみましょう！今回はバレーボールネットを張って、普段の遊びではできない、バレーボールの楽しさを皆で共有しよう！！

the 1990s, the number of people in the world who are under 15 years of age is expected to increase from 1.1 billion to 1.5 billion.

There are a number of reasons why the world's population is growing so rapidly. One of the main reasons is that the number of children born to each woman has increased. This is due to a number of factors, including the fact that women are having children at a younger age, and that there is a higher birth rate in developing countries.

Another reason why the world's population is growing so rapidly is that the number of people who are surviving to old age has increased. This is due to a number of factors, including the fact that there is a higher life expectancy in developed countries, and that there is a higher death rate in developing countries.

There are a number of other factors that are contributing to the world's population growth, including the fact that there is a higher birth rate in developing countries, and that there is a higher death rate in developing countries. These factors are all contributing to the world's population growth, and it is expected that the world's population will continue to grow rapidly in the future.

The world's population is growing so rapidly that it is expected to reach 8 billion by the year 2025. This is a significant increase from the current population of 6 billion, and it is expected that the world's population will continue to grow rapidly in the future.

The world's population is growing so rapidly that it is expected to reach 8 billion by the year 2025. This is a significant increase from the current population of 6 billion, and it is expected that the world's population will continue to grow rapidly in the future.
